## MUSIC TOGETHER

Ages: Newborn-5 years and their moms, dads, relatives and/or caregivers

**Tuesday – Justice Fuller**

**Friday – Justice Fuller**

**Saturday – Gail Browne**

This is the essential Music Together class, one that a child can attend from birth through age five through all nine song collections. This basic class follows the recommendations of child development researchers—grouping children of a variety of ages because this fosters natural, family-style learning. Younger children enjoy watching and imitating older ones; older children learn by leading younger ones; and adults are happy because the children in the family can go to class together to share this important family music experience. Each child participates at his or her own level in singing, moving, chanting, listening, watching, or exploring musical instruments. There is no charge for siblings under eight months (at start date of class). Your family will receive two professionally recorded CDs of the semester's collection and an illustrated songbook with activities and parent education. In addition, all families new to Music Together receive a DVD explaining our principles, research and philosophy.

*September 9 – November 25* (No class October 14 and November 4)

Tuesday, 9:30 a.m. and 10:30 a.m.

## CHESS CLASS

**Instructor: Silver Knights Chess**

Learn how to play chess from a Silver Knights chess coach! Their coaches are highly rated professional chess instructors, who have taught tens of thousands of children to play, including the 2008 national champions for first and second grade. Class time is evenly split between lesson and play. Lessons range from learning rules to advanced tournament strategies. Play time is structured to pair each student against an opponent of similar skill. All chess supplies are provided. Please check out their website at [www.silverknightschess.com](http://www.silverknightschess.com).

## JR MINECRAFT PROGRAMMING

**Instructor: C3 Cyberclub**

Using a custom mod called "ComputerCraft", students will learn how to program robots called "Turtles" inside the world of Minecraft. Kids will utilize problem-solving skills by learning how to program their robots to complete various tasks and objectives such as programming their turtles to automatically build, mine, and craft items and structures. They will be introduced to programming if-then-else statements, for-while loops, and implement their own functions using Lua, a simple scripting language. ComputerCraft is an easy-to-install mod that can be downloaded to your PC/Mac/Linux. Programs created in class can be easily saved to a small flash drive, installed, and edited at home. Looking for a fun way to introduce your child to programming? Why not do it using a game they love! Note: Basic reading skills required. Experience playing Minecraft preferred, but not required. \*NO CLASS 9/27

## 3D GAME DESIGN

**Instructor: C3 Cyberclub**

In this exciting class, children will use basic 3D modeling skills to create their very own platform-based video game. Students create their own unique puzzles and challenges in a 3D game world utilizing tools such as teleporters, jump pads, and lava. They also learn how to add characters, customize game attributes, and build their own virtual world from scratch. Students use

their imagination, and problem-solving skills in order to find new ways to create different in-game puzzles for their classmates to solve. By the last class students will have a fully functional level and will receive a link to download the software and student levels. Looking for a way to introduce your child to the wonderful world of video game development. \*NO CLASS 11/27
